SF90 SPIDER — IN THE EVENT OF AN ACCIDENT

DEACTIVATING THE HIGH VOLTAGE SYSTEM

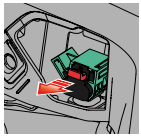

1

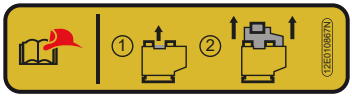

2

3

1. If the internal combustion engine is still running, turn the vehicle to KEY-OFF state.
   IMPORTANT: The vehicle may only be considered to be in KEY-OFF state if the engine is off and the message eD "READY" does NOT appear on the instrument panel.
2. Access the engine compartment and remove the cover on the cosmetic shield.
3. Pull out the HV service connector as indicated on the label.

If the HV service connector is not accessible, proceed as follows:

A

B

A. Remove the inspection cover to access the fuse box on the left hand rear side panel.

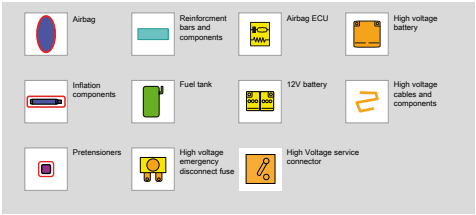

B. Remove the fuse with the tab.

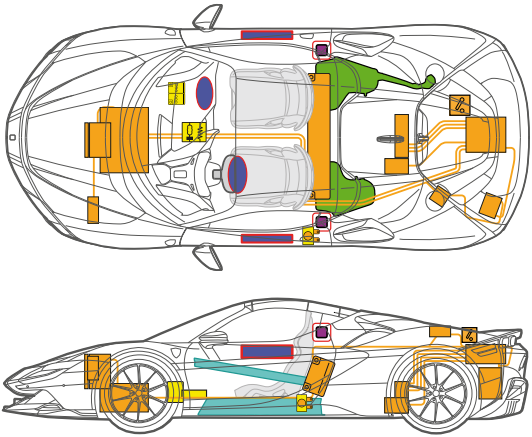

WARNING

The high voltage system does not discharge immediately after deactivation. Wait at least 30 seconds before working on the vehicle. Do not touch or cut any cable, connector or component of the high voltage system: failure to observe this precaution may result in severe injury or death.
